

## Sony SNC-CHI 10 POE Colour 1.3MP Vari-Focal IP Fixed Lens Tube Camera

- ✓ 720P Dual-Stream
- ✓ Exmor CMOS Sensor
- ✓ H.264, MPEG4, Jpeg
- ✓ 0.2Lux Colour with 3.3mm Fixed Lens
- ✓ AGC
- ✓ ATW-Pro
- ✓ DNR
- ✓ EV Compensation
- ✓ PoE Only

The SNC-CHI 10 is a compact indoor high definition (720p) 1.3 Megapixel (1280 x 1024 maximum resolution) fixed camera with Electrical Day/Night function, DEPA and ONVIF compliance. It supports dual streaming and triple codec encoding.

Sony's X-Series cameras have outstanding picture quality and a compact, affordable, stylish design.

### Compact and Stylish design

A compact, stylish and discreet design that compliments any surveillance environment.

### DEPA

The SNC-CHI 10 offers intelligent video analytics, based on the Sony DEPA platform. DEPA is a combined function of the intelligence built in to the camera and rules/filters that determine which images should be recorded or when an alarm should be triggered.

### EXMOR and CMOS Sensor

High resolution CMOS sensor with low noise characteristics for improved image acquisition. Derived from Sony's broadcast product range, EXMOR is one of the highest quality image sensors available.

### Power over Ethernet (PoE) capability

Supporting Power over Ethernet (PoE), the camera can be powered using the same Ethernet cable it uses for data transfer. This feature greatly reduces the physical infrastructure costs and speed of deployment.

### ONVIF (Open Network Video Interface Forum) compliance

The ONVIF (Open Network Video Interface Forum) defines a common protocol for the exchange of information between network video devices including automatic device discovery and video streaming. Allows interoperability between network video devices.

## **HD (720p) resolution**

Detailed 720p HD progressive images. Progressive acquisition (as opposed to interlace) means that images are more stable to view, contain more information and compress more efficiently - without "interlace artefacts".

## **Supports multiple industry standard codecs: H264, MPEG-4 and JPEG with dual streaming capability**

This multi-codec camera supports three compression formats: JPEG, the best choice of high-quality still images; MPEG-4, the format that provides clear moving images efficiently over limited-bandwidth networks; and H.264, the alternative for severely limited-bandwidth networks, providing twice the efficiency of MPEG-4. The camera can generate multiple streams simultaneously.

## **Stream Squared Function**

An incredibly useful function that allows simultaneous streaming of two 4:3 aspect ratio videos in user-selectable SD resolutions. You can select the entire image or a portion of the image from the original view and resize to SD resolution. With this feature the SNC-CHI 10 can replace two SD cameras installed in the same line of view.

## **Electrical Day/Night**

Ensures that the camera is operating with the optimum sensitivity for both day and night conditions

## **Analogue Monitor Output**

This allows an analogue video monitor to be connected directly to the camera.
